

STOUGHCOOL

WE KNOW COOLANT.

FINLUBE 6

Stoughcool's FinLube 6 is a premium oil that is highly fortified and formulated for drawing and lubricating of fine wire. It can be used on aluminum, stainless steel, carbon steel and other alloy materials. Stoughcool FinLube 6 does not contain sulfur or chlorine additives and runs very clean without the unwanted foul odors from sulfur and other extreme pressure lubricants that are traditionally used. Formulated to run clean and operator friendly, Stoughcool FinLube 6 is not "smokey" and has a low viscosity enabling it to lubricate exceptionally well. It is formulated with non-corrosive anti-wear additives and provides excellent corrosion control and surface finish.

LAB DATA	
Physical State	Liquid
Color	Water White
Solubility	Insoluble in Water
Flash Point F	275 F, COC
