

## The Ultimate High Performance Cutting Lubricant

# JET GRIND CHROME 5

Stoughcool's Jet Grind Chrome 5 is a premium high-performance carbide grinding fluid designed for grinding applications, including tungsten carbide. It is formulated with the most premium synthetic oils that are inhibited for oxidation and air entrapment. They contain wetting agents for better cooling properties and provide much better performance than traditional mineral oil-based products. Stoughcool's Jet Grind Chrome 5 is compatible for use on all types of carbide, as well as ferrous and non-ferrous metals. It is extremely clean and will not cause staining on any metals or cobalt leaching of carbide. Stoughcool's Jet Grind Chrome 5 is water-white clear with a mild fragrance added for operator acceptance. This premium product will outperform refined petroleum oil-based products by reducing smoking, misting, and degradation due to temperature. Stoughcool Jet Grind Chrome 5 is the top of its class for grinding carbide, and its clear water white appearance makes it clean and easy to see parts during grinding applications for machine operators.

Appearance	Clear, Water White
Specific Gravity	0.802
Density lbs./gal.	6.68
Flash	>350° F
Viscosity, cSt @ 40° C	6.0
Viscosity, SUS @ 100° F	47
Copper, 24hr Ambient	1A
Copper, 3hr @130° F	1A
